"ROSEBUD" TEA

"Fresh from the Gardens"

The Past, The Present and The Future.

Poets have written of "The past I leave behind"; men of affairs have stated the same thing, wayfaring youth promising to return have made such declarations; all of us have been exhorted to "let the dead past bury its dead."

But can the past ever be left wholly behind? Does it not always intrude into the present and even project itself into the future? Is not the present made up largely of the accumulated experiences of the past, and will not the future be moulded in the experience of today? All history proves that this is so.

Furthermore, even if it were possible to leave the past behind, to wipe the whole slate clean and begin all over again as if what has gone before had never been, would it be a wise course of action? In some respects, perhaps, yes; in other respects most decidedly, no.

The past, it is true, is now only of value for the experiences it has provided, for the lessons it has taught, for the accumulations of wisdom it has thus stored up for our guidance, for the advances that have been made, and are now ours, in the onward and upward march of the race since prehistoric days. And it is because of these gains that it would be most unwise to completely blot out the past, even if we could.

Even the mistakes, the errors, the foolishness, the sins of the past should not be forgotten; they, too, have their value. They are the serious points along the road of the present, stretching on into the future, to warn us of dangers, to point out what to avoid.

But the past and its experiences, insofar as they resulted in discouragements and disappointments, weakening our wills, breaking our courage, lessening our initiative and energies, should be relegated to the limbo of the forgotten. They have no value, and constitute nothing but hampering drags now and throughout the days and years to come. They may well be wholly erased from our memories; left to the past to be forever buried by and in it.

And the present? It is our only opportunity. We may have a future, and we may not; no one can tell. But we have the present; it is now ours to use or abuse. And we have the past to guide us in the manner and method of its use. And the future, if we are accorded one, will largely be what we make it by the use, or abuse, we make of the present.

Down through the ages our customs of life, our daily habits, our modes of thought and action, our institutions of government, our community existence, even our physical beings, have been developing and moulded to the forms of today. Man has profited by the lessons and experiences of the past, and he must continue in the present to profit, to learn, and to apply his learning to the problems of the present if his own future, and the future of his children and of the race, is to be better and brighter than is the present.

From the dark ages to the present, mankind and the world in which we live has progressed. At different stages progress has been achieved by great upheavals, by revolution, but it has been through the less spectacular processes of evolution that the greatest upward strides have been made, those having the most far-reaching, most beneficial and lasting results for the betterment of all. This very fact, these experiences out of the past, have a lesson for the world of mankind today.

We have been suffering from a so-called business and economic depression. Times have been difficult and discouraging. Men and women in all countries and in all walks of life have been, and many still are, discouraged. Some are desperate, and talk revolution. But the past, if we will heed its warnings, teaches us that by revolution they suffered the most, while it has been by and through evolution that the greatest gains and blessings to the masses of the world's inhabitants have been secured.

In times like the present, men's views become distorted and their thinking unsound. This is but natural; it is, indeed, human nature. They are prepared to go to extremes in the present without counting the cost of what the future will call upon them and their descendants to pay for the mistakes they may thereby make.

The present, therefore, is not a time for men to say: "The past I leave behind," except in the sense that they leave the errors and follies and unsound thinking of the past out of their reckoning and plans for the present and future. Rather it is a time to remember and closely study the past, the experiences of the past, and the results which flowed from those experiences, with a view and a determination to profit thereby, rejecting what time and experience has proven to be bad, and incorporating, extending, strengthening those ideas and principles which have revealed their soundness into the warp and woof of the future.

A Really New Idea

Woman Eighty-Two, Has Plan To Salvage Old Age

Dr. Lillian Jane Martin, consulting psychologist of San Francisco, who has spent more than half a century as an educator and will celebrate her eighty-second birthday in July, arrived at New York the other day fresh and active after driving her own car across the continent and lecturing in the large cities along the way. "I am here," she announced, "to present the whole matter of salvaging old age. For example, the weakness of being too slow: Many old people started life when the tempo of society was much slower than it is today. And so they must be speeded up to modern conditions. Both physical and mental exercises can be given them to the speed of whatever industry they are in."

Headed Right Way

Britain sees the number of unemployed persons going down. March found 133,000 more persons at work than in February. There are still 2,567,332 who are on pay roll under the Government, but that is fewer by \$30,000 than last September. The British worker does a little whistling. He is still in the woods, but he likes the way he is headed-out, not in.

Ayr, Scotland, is to have public covered salt-water baths.

Small automobiles are becoming popular in British Malaya.

Nor Heart Was So Bad Couldn't Do Housework

Mrs. S. Dragonan, R.R. 2, Midland, Ont., writes:—"I had been troubled with heart trouble for many years. My heart would beat so fast I could hardly breathe, and I had headache, and dizzy and fainting spells. I couldn't get my housework done I was so weak. I took three boxes of Milburn's Heart Nerve Pills and felt much better, and now I would not be without them in the house."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Price 50c a box

A Promising Sign

Many New Manufacturing Industries Are Starting In Britain

Students of the British industrial situation are pointing out that the returns from the Patent Office indicate an increased tendency to protect in Great Britain the production of commodities which hitherto have been largely supplied from foreign countries.

It is of great interest to note, in this connection, that there have been many applications for patents for silk manufacture, hitherto largely controlled by France; for laundry machines, up to now regarded as an exclusive American monopoly; and for dye and alloy manufactures, of which Germany has been the principal originator in the past.

In all these varying fields new industries have sprung up in the Old Country, and so far as dyes and alloys are concerned, the manufacture is now predominantly British, while silks and other products are being manufactured in Britain in ever-increasing volume. At a time when business is supposed to be going to the bow-woes, surely this is a promising sign.

Where Butter Is Dear

Russian Housewives Have To Pay \$2.50 Per Pound

Long queues of women are forming daily in Moscow again because of the serious shortage of butter, milk, eggs and sugar. After a year in which these lines of waiting housewives had been almost eliminated, they have been brought back to the doors of the so-called commercial stores by the thousands.

The commercial shops are government-owned, but are distinct from the ordinary rationed government shops, from which dairy products have virtually disappeared. The commercial shops sell goods at much higher prices and without food books. Butter sells at about 7.30 rubles (nominally \$3.00) a pound and despite the price, there is usually a race to the shops as soon as news of receipt of new supplies is circulated.

Acids In Stomach Cause Indigestion

Create Sourness, Gas and Pain. How To Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. This acid, when in excess, irritates the stomach lining, and is, in fact, a poison. It causes indigestion, and every stomach sufferer knows the effects of this acid. Antacid digestants are not needed in the treatment of this condition. Try laying aside all digestive aids and eat only plain food. This will rid the stomach of the excess acid. Take a teaspoonful of Magnesia and take a teaspoonful of water right after eating. This sweetens the stomach and there is no sourness. In powder or tablet form—never liquid—this is the best remedy. It is the most inexpensive to take and is the most effective. It is used by thousands of people. It is the best remedy for all cases of indigestion.

New R.C.M.P. Appointment

Inspector T. V. Sandys Vainly Named Successor To Inspector Joy

A member of the Royal Canadian Mounted Police for more than a score of years, Inspector T. V. Sandys Wunsch, who is now stationed at Cranbrook, B.C., was announced recently by Major-General J. H. MacBrien, commissioner of the R.C.M.P. He succeeds Inspector A. H. Joy, famous Arctic explorer, who died at Ottawa, April 26. The new inspector of the eastern Arctic will have his headquarters in Montreal. Inspector Wunsch will visit his far northern posts this summer, leaving for the Arctic, July 9, aboard the Hudson's Bay Company vessel "Unavak."

In Many Languages

The McGill Alumni Library now supplies reading matter for a stationer of words, to patients at the Royal Victoria Hospital, Montreal. It was reported at the annual meeting of the Hospital Libraries Club recently. During the last year books in Swedish and Hungarian were added and as another feature the library was opened one night a week to doctors and nurses.

Miller's Worm Powders now supply the infantile system untamable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other abnormal disorders that the worms create. Children thrive upon them and no matter what condition their bowels are in, worms may be in, they will show improvement as soon as the treatment begins.

Unveiling Is Postponed

Imperial war graves commission has postponed the unveiling of the great Somme memorial as a mark of respect to the memory of the late President Paul Doumer of France. The president was to have participated. The unveiling of the Arras memorial, to have taken place May 15, has also been postponed. It is probable the Somme memorial will be unveiled August 1.

Russia's Plan

Russia's famous Five Year Plan doesn't appear to be running on schedule. A plan on paper and a plan in operation are two vastly different things. There is the difference of the human element.—Ottawa Journal.

LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruschen Salts for 3 months, and have reduced from 185 lbs. to 155 lbs. (age 40). I am a heavy eater, and have never dieted in any way. Also I have never felt any ill effects while I have been taking Kruschen Salts.—T. H. That is an instance of Kruschen succeeding without assistance. But if any fat person will be satisfied with a moderate diet, and will take one half teaspoon of Kruschen Salts in a glass of hot water before breakfast every morning—they can lose fat in just the same way. This is what Kruschen Salts does—it cleans out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fills you with a vigor and tireless energy you'd almost forgotten had existed—you get the needed exercise. As a result of this activity, which keeps you moving around doing the things you've always wanted to do and needed to do, you feel you are in good condition."

Oil Averts Ship Disaster

Pumped Into Water Calmed Huge Waves On Pacific

Oil calmed troubled waves in a very practical way when waves from 50 to 60 feet high in the middle of the Pacific Ocean threatened to wreck the steamer "Elisabeth Kellogg" on its recent voyage from Manila to San Pedro, Calif., the hydrographic office of the U.S. Navy has been informed.

The worst seas that Capt. Kort, in command of the vessel, has seen in his 35 years' experience as a captain, rolled over the lower decks and finally carried away everything and dented the after steel deckhouse seven inches. All hands stood by only hoping that the ship would not be "scrambled to pieces before their eyes," Capt. Kort said.

Then oil was pumped through sanitary drains on the water. After the oil spread, the combers lost their terrific force and rolled safely under the stern of the vessel instead of breaking over the decks.—Science Service.

New Thieving Plan

Scotland Yard Looking For Gang Robbing Letter Boxes

A gang specializing in a combination of thieving and forging are occupying the attention of Scotland Yard. In search of letters containing checks, they fish in public and private letter-boxes, using typewriter as bait. Much of this work must prove futile, unless they have inside information or work at suspicious times, such as late at night, or at the weekend.

Forgery of the purloined checks is a specialized job, which can be detected only by the use of ultra-violet rays and the aid of a handwriting expert. The gang's methods are so characteristic that they offer to Scotland Yard a ready means of identifying their handwork.

If Edgar Wallace were still alive, a new book or play featuring these novel exploits might be expected in a few weeks—or even days.

Wheat Export

Prospects Are Seen For A Better Export Movement In Near Future

Prospects of a better export movement of wheat, especially after the war, when southern hemisphere wheat is exhausted, are forecast in the monthly report of the statistical department of the Board of Grain Commissioners on the movement of western Canadian crops in April. Freight rates have dropped to low levels on the Great Lakes with little business offering. There has been a noticeable demand for rye of late.

Asthma Is Torture. No one who hasn't grasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurably the relief provided by that marvelous preparation, Dr. J. D. Drugg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

No Wood Is Solid

The solidest and soundest kind of wood is not really solid at all. It is full of air—twenty to forty per cent of its total bulk consists of gases, trapped in the minute tubes and cell cavities that all wood is made of. This appears from the researches of Dr. D. MacDougal, of the Carnegie Institution of Washington, who reported them.

The two-family car seems to have supplanted the two-car family.

Teething

"Baby's Own Tablets take away that teething fever," writes Mrs. Alfred Bungey, North Sydney, N.S. Effective also in relieving colds, fever, colic, upset stomach, constipation, children like them. Absolutely SAFE—See analyst's certificate in each 25c package. 21c per box.

BABY'S OWN TABLETS

W. N. U. 1942

The Caragana Hedge

By G. D. Matheson, Dominion Experimental Station, Scott, Saskatchewan

Adaptation and use of common caragana (arborescens) for hedges and related purposes in the prairie provinces of Canada are forcefully demonstrated by the fact that over 10 tons of seed were collected and sold in 1931. Enquiries concerning the sale of this hedge prompts a summary of the most important facts.

While caragana can be started in a permanent location from seed and thinned to the required distance, it is preferable to start with young trees. A summerfallow strip, wide enough for some form of cultivation, is preferable. Seedlings should be set about a foot apart and planted in early spring. A single row is preferred. It is advisable to set them a little deeper when transplanting in order to encourage a bushy growth. One-year trees can be cut back within an inch or two of the surface, cut back to almost a foot in length the second season, and trimming to the desired shape can start the third year.

After a caragana hedge has been established, trimming is necessary every year. At the Dominion Experimental station, Scott, Sask., caragana hedges are trimmed during the last week of June. After that date there is sufficient growth to cover up the wounds. Their appearance can be better maintained by trimming off irregular second growths a few weeks later.

Just what permanent shape should be maintained is a matter of taste. A rectangular shaped hedge lacks the gracefulness of one which incorporates gentle curves. It is preferable from a standpoint of balanced appearance to have the width maintained, or slightly increased at the base. A rounded surface at the top offers a pleasing appearance. Future width should be borne in mind, so that it is often necessary to trim back almost to the old wood every year.

Moscow Removes Restrictions

Soviet Government Begins To Improve Living Conditions Of The People

The Moscow Government has begun making good its promise to improve the living conditions of the people, it appears with the issuance of a decree permitting unrestricted sale of a number of staple articles which heretofore have been very hard to get.

Certain articles of food such as milk, eggs, cheese and tea, are taken off the ration list of foodstuffs which can be bought only in limited quantities. Still on the list, however, are flour, butter, gruel, herring, butter, oil and sugar.

Also removed from the ration category are candles of all kinds, tinned foods except meats, soap and cigarettes and knitted goods. Restrictions on the sale of men's clothing are partially lifted.

It must be remembered, however, although the decree permits purchase of these articles, prices are still exceedingly high and the supply is small.

Train Makes Record Run

English Express Covered 105 1/2 Miles In 100 Minutes

A record run has been made by the London & North Eastern Railway 7.30 express from Leeds, which covered the 105 1/2 miles between Grantham and London in 100 minutes in spite of a delay of three minutes at one place where a new track was being laid. The highest speed record was 90 1/2 miles an hour, reached at Essendon. The train weighed 350 tons.

Express trains from King's Cross and various stations are now arriving in Edinburgh. Scotland is twenty-five minutes ahead of their usual schedules. The new time between London and Scotland is being maintained by two railroads.

Provide Good Market

Norway and Sweden Combine Large Quantities Of Horse-Meat

Norway and Sweden are excellent markets for Canada's horse meat industry, according to a trade commissioner's report from Oslo. These two countries, it was stated, had been importing and producing horse meat for years but, owing to financial difficulties and exchange fluctuations, they were seeking other sources of supply.

Norway consumes 850,000 pounds of horse meat annually while Sweden's consumption totals 2,000,000 pounds.

Got His Money's Worth

Two men attended a village church tea for which the tickets were a shilling each. The profits were to go toward providing comforts for the aged poor of the village.

Brown, after accounting for four cups of tea, a dozen sandwiches, three plates of bread and butter, five jam tarts and four buns, was passing his cup for the fifth time, when he turned to his companion, who was also doing well, and said, "I think everyone should encourage a thing of this sort—it's such a good cause."

Nowadays people not only refuse to give credit where credit is due, but they won't give credit where cash is due either.

Trapper Meets Tragic End

Perishes From Cold In Shack In Northern Woods As Result Of Accident

Solution of a five-month mystery and the end of a Royal Canadian Mounted Police search came recently with the arrival at The Pas of a Mountie patrol under Constable W. Barre, bringing the body of Oscar Morrell, missing trapper, from one of his trapline shacks 24 miles east of Mile 374 on the Hudson Bay Railway lines.

Morrell left Mile 374 on Christmas Eve last, planning to be gone two weeks on a hunting trip. It is believed while covering his trapline he accidentally discharged his rifle and blew off his right hand. Driving his team of dogs, he staggered through the snow to starve of his trapline shack, where he made a rude and futile effort to stop the flow of blood from his injured arm. As he weakened rapidly he built up the fire in the shack to keep out the freezing winds, using chairs, part of his bed, and even his snow-shoes in his effort to keep warm.

When friends here became alarmed at his long absence, a detachment of Mounties set out to search for him, and broke into his shack to find his body in the fatal setting of his trapline struggle against death. His body was brought to The Pas for identification and burial. He is believed to have lived in Winnipeg and Saskatchewan before coming north to trap.

Radio In Dummy Funnel

This Innovation Will Be Seen On New British Liner

A dummy funnel will be used to house the wireless equipment of the White Star liner "Georgie," which is rapidly nearing completion at Belfast. The aerial and direction finder both will be inside the giant funnel, and thus screened effectively from local electrical disturbances. The top of the funnel will be open, and with the aerial fitted on the roof of a cabin inside, it will be possible to obtain uninterrupted wireless signals for direction finding. The screening will be so complete, in fact, that the usual work of eliminating electrical interference from the ship's motors will be unnecessary.

Isabella Horses Are Scarce

Special Breed Can Be Obtained Only In Germany

Isabella horses are being sought in Germany by Captain Hopkins, regarded as one of the best judges of horses in India, at the behest of a Maharajah. They are a special breed with brownish yellow coats and white manes and tails. They are wanted to draw the Maharajah's state coaches. Horses of this type used to be bred throughout Europe by various princes, the status of the Kings of Hanover in Herrenhausen, being specially noted for them, but now so far as is known they are only bred by one private dealer in Germany.

Flivver Details Freight Train

Knocks Eight Freight Cars Off The Track At Level Crossing

They tell of a mouse falling into a rum barrel and crawling out crying for lions to fight.

Recently at a level crossing near Gravenhurst, Ont., a "flivver" side-swiped a Canadian National Railway freight train and derailed eight cars. It charged screaming and died screaming, a total wreck, but in its death agonies it guarded its own driver, T. E. Callon, Orilla, and another passenger, William McEwen, both of whom escaped with minor bruises. None of the train crew was injured.

Why suffer needlessly! Douglas's Erythra Liniment brings quick, sure relief to ached feet, soft corns and warts. Relieves inflammation. Removes proud flesh.

The Last Laugh

The Scotsman was showing his American friend round the country. "That's a fine train for ye," said the former, pointing to an express which had just appeared out of a tunnel.

"Sure," agreed the American, "but we've got trains twice as big as that in the States."

The Scotsman was silent for a while.

"That's a fine building for ye," he said. "What do ye think of it?"

"Baw," laughed the American, "that's nothing. We've got hundreds of buildings bigger and better than that."

"Aye," returned the Scotsman, "I expect ye have. That's an aysium."

The North Pole is not by any means "the coldest thing in the universe." Liquid hydrogen has a temperature of 425 degrees below zero.

King George's new six-month-old terrier refuses to recognize anyone at Buckingham Palace except the king.

Dogs are most apt to suffer from rabies in spring, not in hot weather as many people believe, says a university professor.

The foreign-born amongst us flock to art museums and seem to enjoy them.

Thousands Mothers Are GRATEFUL

"I wish I had known about this when I raised my first baby," say many mothers tell us. "Freel, crying babies make mothers grow old. Our new Baby Welfare Book tells how to keep your baby laughing and well—a joy rather than a care. Write us and it will be mailed to you free."

Considering Plans For Railroad Across Sahara

Low Building, Cost Great Incentive

The depression sometimes has curious and conflicting effects. From South America comes the report that it has led to the closing of the famous railroad over the Andes which links Argentina and Chile; from France dispatches relate that it has led to a definite and practical revival of the project for a railroad across the Sahara. If in the one case decreased traffic has made further operation unprofitable, in the other reduced costs of building material and a plentiful supply of labor are advanced as reasons which make this an especially propitious time for construction. The Saharan project is a gigantic undertaking which demands for its success the economic exploitation of a vast area of land which is now virtually useless. The cost of the railroad itself, entirely apart from the scheme for developing vast irrigation works in the Sahara to be fed by a canal from the Mediterranean, is put at \$100,000,000. That an influential group of French engineers is even considering a Saharan railroad at a time like this is striking evidence that in France at least they apparently do not believe the world is coming to an end. We hope that if news of the closing of the two-mile-high line over the Andes reaches Paris, it will not discourage these promoters of what would probably be the world's lowest and flattest railroad.

Paid Taxes With Coppers

Indians Man Had Over Thirteen Thousand In Chest

David Johnson, a companion attracted the eyes of a policeman when he hoisted a tool chest to the top step at the city hall, then sat back exhausted. "Where are you going with that box?" asked the officer. "Going to pay my taxes," replied Johnson. He opened the chest, took out 13,700 pennies and got a receipt for his \$137 assessment.

Persian Balm—The one toilet requisite for the dainty woman.

Delightful to use. Leaves no stickiness. Swiftly removes all blemishes. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Problem For United States

In little more than twelve months nearly 400 persons have been kidnapped in the United States, mostly for ransom, which frequently has been forthcoming. Some of the victims are from comparatively humble homes, which shows that the criminals are extending their field. The crime is reaching the dimensions of a national problem.

Growing Their Own

Gardeners in Iceland are using the hot springs for horticultural purposes with such good results that they claim that Iceland need import no more foreign vegetables—they can grow sufficient to supply the whole island. The islanders are starting a campaign with the slogan: "Buy Icelandic."

Iron and steel plants in Japan are showing increasing activity.

Economic Organization Within The British Empire Is Urged For Boosting Inter-Empire Trade

Formation of a permanent economic organization within the British Empire and elimination of party politics from imperial trade conferences were urged by Hon. Frank Carroll, prominent Quebec publisher, as steps toward restoring inter-empire trade. The proposed permanent economic organization should be similar to the League of Nations, Mr. Carroll said in his address to the Canadian Club and Calgary Board of Trade members.

The speaker believed one important result of the coming Ottawa imperial conference would be the organization of such an economic body as he suggested. This body would "technically, scientifically, and economically" find the solution to many problems now engrossing all the peoples of the empire.

Prominent Englishmen were rapidly becoming converted to the idea, he continued, and sympathy was growing stronger throughout the empire.

Mr. Carroll's plan also included an empire educational campaign through the press, platform and radio; founding of an empire commercial university; assistance in the promotion of British branch factories; co-ordination of trade agencies and consular services; construction of empire warehouses in leading industrial centres, possibly by creation of free ports; interchange of business data through the empire; uniform code and, finally, effecting favorable treaties with world trading stations.

Criticism For Food Fads

Three Factors Determined Proper Diet, Opinion Of Expert

Magazine and newspaper advertisements which state that certain food products are indispensable to the human diet came in for stiff criticism from Dr. L. M. Rabinowitz, assistant professor of medicine at McGill University, and director of the department of metabolism at the General Hospital, in an address to members of the Montreal Canadian Club recently.

Three factors alone determined the diet of man and these, he said, were the food available, his ability to secure such food and the food's taste, digestibility and richness of nutrient matter.

According to orange growers, he said, half the world had acidosis and the other half were about to have it and for these they urged the use of orange juice in the diet.

"Life insurance firms who examine applicants for policies do not ask these people if they drink coffee," he said after quoting an advertisement predicting the alleged horrible fate of coffee-drinkers by the manufacturers of non-caffeine beverages.

"We are urged to consume huge quantities of milk if we wish to be healthy," he continued, "but with all mammals, the young receive milk from the female parent for a definite period and no longer." In some parts of the world, he pointed out, "milk is a rarity, yet people who live there do not die off like flies."

U.S. Wheat Exports

Made International Gain In March

Over Recent Months

Wheat exports of the United States made a substantial gain in March over recent months. The index was 79, as compared with 73 in February and 74 in January. A year ago it was 53. All other export groups, however, fell off sharply.

All principal European countries except Italy took more wheat in March than a year ago. Total exports thus far this season amounted to 106,998,000 bushels against 102,509,000 a year ago.

Development Of Aerial Photography

Notable progress has been made in Canada in the employment of oblique and vertical aerial photographs for mapping some of the little known parts of the Dominion. The Topographical Survey Branch of the Department of the Interior, is the central clearing house for aerial photography in Canada, over 500,000 photographs being on file in that branch to date.

Telegraph wires in East Africa have to be carried on exceptionally high poles owing to the liability of giraffes breaking the cables.

"When is high tide, captain?"
"At 5.55 p.m. But I have told you twice already."
"But your chin waggles so comically when you say 5.55."—Hummel, Hamburg.

W. N. U. 1942

Schools Need Freedom

England Taking Advantage Of New Idea Of Education

English education is very much alive. There are still dull patches in it, of course; but, go where you will, you are never far from a school which is showing strong power of adaptation to the new needs of the community.

Three times before in history English education has flushed with renewed energy: first under Alfred, next at the time of the Reformation, and last in the early days of Queen Victoria. But never till now has it been free from the cramping influences of poverty. Today it is well furnished and free in its choice of methods of work. The teachers are at liberty to try new ways of teaching; to get into the open air; to use other tools than the pen. A school needs space, zest and freedom if it is rightly to train those who a few years hence will make or mar the tone and temper of town and village, of factory, shop and farm. Not all the schools have yet made full use of their new opportunities. But England is now dotted over with good examples of the new education.

Great Spread In Prices

Varying Cost Of Foodstuffs In U.S. Is Puzzling

If we had some ham we could have some eggs if we had seven cents if we lived in Texas.

The department of agriculture has discovered eggs are seven cents a dozen in Texas and 22.8 cents in Massachusetts.

It finds prices of foodstuffs vary throughout the country as much as 300 per cent.

Apples cost anywhere from 55 cents a bushel to \$1.85; chickens from nine cents a pound to 20.5 cents; farm prices of lamb range from 4.3 to seven cents a pound; sheep from 2.1 to 4.7 cents; calves from 3.9 to 8.4 cents; beef cattle from 2.6 to 5.5; wheat sells for 35 cents in Oklahoma and 84 cents in Georgia.

In some states the average prices for farm products are so low as to read like a price list of 1852.

Fashion

SMALL DAUGHTER FOLLOWS SUIT IN GUMMIE DRESS MUMMY IS WEARING

Add this new gummie dress to small daughter's wardrobe—both you and she will love it!

The clever design of this model has taken yellow Swiss with white dots for the blouse. Plain linen in French blue made the skirt and suspender straps. It's a most pleasing combination.

Of course all sorts of attractive summery materials could be used for this cunning model. Tomato-red plus with white daisy with tiny pink dots is very effective. Navy blue sheer wool with the gummie of red and white checked gingham is quaint and extremely fashionable.

Style No. 434 is designed for sizes 8, 10 and 12 years. Size 10 requires 1 1/2 yards of 35-inch material for blouse and 1 1/2 yards of 30-inch material for skirt and trim.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Bees Are Preparing For Season's Work

Abundant Food and Protection From Cold Essential To Strong Colonies

During the winter months there is little or no activity within a bee colony, for during the cold weather the only matter of concern to the bees is to secure enough food and to keep warm.

Sometimes last fall the queen ceased her egg-laying, and as the comb became empty of brood they were filled with food for the winter. As the weather became cold the bees gradually clustered closer and closer around their queen until finally a fairly compact cluster was formed, and, except during an occasional spell of warm weather, this cluster may remain unbroken for a period of five or six months.

During the winter, the cluster moves about within the hive, at all times keeping in contact with the food supply. Towards spring an unknown something will inform the bees that summertime is again on its way and the cluster will gradually loosen and expand and in the centre of the cluster the queen will again resume her work of egg laying. Only a few eggs are laid at the start, but as the days lengthen and the sun becomes stronger, the number gradually increases until as high as 2,500 may be deposited daily.

In outdoor wintered colonies, egg-laying usually commences some time during the month of March, depending greatly upon the weather. In some localities such activity may be resumed even earlier. Cellular wintered bees do not usually start so early as outdoor wintered bees, except under abnormal conditions. This early egg-laying is of great importance to the beekeeper, for it is the eggs laid during the spring and early summer that will produce the bees to gather the honey harvest. The larger the force of field bees at the commencement of the harvest, the greater will be the crop, and it follows that the greater the number of eggs laid during the early part of the season, the larger will be the field force. To get the maximum number of eggs laid, three things are necessary. A vigorous and prolific queen; an abundant food supply; and adequate protection from cold and changeable weather. Neglect to supply any one of the three will result either in starvation and death of the colonies or in colonies that are too weak in bees to gather a surplus of nectar when the honey flow is on.

Another Step Forward

Short Cut In Method Of Cancer Diagnosis Found

A short cut in cancer diagnosis promising more hope for the most malignant cases was shown, to the American Medical Association at New Orleans.

This new method enables an expert with a microscope to see at almost a glance whether a cancer can be benefited by radium. About one-third of all cancers are helped by radium while the other two-thirds are not.

The very malignant growths fall largely in the radium class and as they are the fastest spreading, the time saved in diagnosis is also life saving.

Record For Inventions

The Wall Street Journal says: "Depression, as well as necessity, may be taken to be the parent of invention, for within the last six months the number of inventions patented or awaiting patent papers is greater than in any similar period on record in this country. It seems that unemployed men are using their enforced leisure to perfect mechanical devices of all sorts."

The depression has hit the ball-players hard. There used to be 40 professional leagues; now there are only 16.

Siberia is nearly twice as large in area as Canada.

PROMOTED

L. A. B. Hutton, newly appointed superintendent of the Department of Communications, Algoma district, of the Canadian Pacific Railway. Mr. Hutton was inspector of telegraphs, as the department was formerly called, at Calgary, until the fall of 1931, when he was transferred to Winnipeg in the same capacity. His headquarters are now at Sudbury, Ontario.

Plants Valuable In Detecting Gas Leaks

Suggested As Safety Precaution For Crew Of Submarine

Crews of submarines may in future carry potted tomato plants with them, as sailors on battle ships have parrots and geese.

But these green marcos will not merely pet; like everything else in the crowded interior of a "sub," they will have to pay their way. And they can do it by giving warning of gas leaks, long before even that most sensitive of animal detectives, the canary, could detect them.

This is one of the possible uses of the peculiar behaviour of plants in the presence of ethylene gas that was suggested by Dr. William Crocker of the Boyce Thompson Institute for Plant Research, speaking at one of the closing sessions of the American Philosophical Society's meeting at Philadelphia.

The value of many plants for this purpose depends on the curious behaviour of their pet'ies or leaf-stems in the presence of very dilute quantities of ethylene gas, a common ingredient of illuminating gas and almost invariably present with carbon monoxide.

Dilutions of ethylene as low as one part in ten million of air will cause tomato leaf stems to begin growing on the upper side where they did not grow before, thus causing them to bend downward instead of up. This effect was first demonstrated several years ago by Sarah L. Dought, and has since been the subject of much research by Dr. Crocker and other plant physiologists.

Usually, if a potted plant is turned upside down and then exposed to ethylene it does not react. The reason is that the ethylene anesthetizes the plant, destroying its response to the pull of gravity.

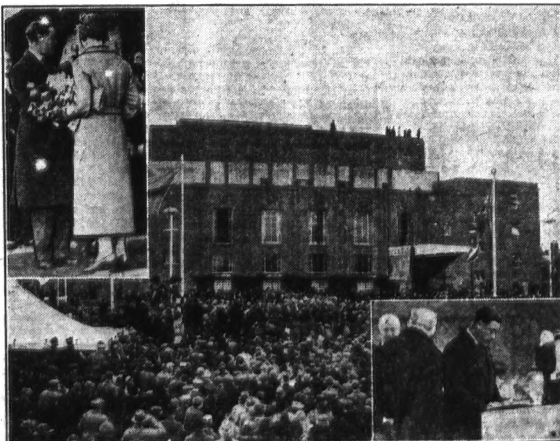

Will Not Need Fire

Civilization Of Future Will No Doubt Have Substitute

The prediction that fire, which has played so strategic and friendly a role in man's progress, will be needless in future civilization was made by Dr. Walter Hough, chief curator of anthropology of the U.S. National Museum. Dr. Hough based his prophecy that we shall become independent of fire upon the ground that other natural resources will be utilized. The germ of this future phase of civilization is already developing in modern invention, Dr. Hough said.

There is no point on the earth where the moon never shines.

THE GREAT DAY AT STRATFORD-ON-AVON

These pictures give a few glimpses of the ceremonies which marked the opening of the Shakespeare Memorial Theatre at Stratford-on-Avon, England. The main photograph shows part of the huge crowd gathered in front of the new theatre while inset (top left) the Prince of Wales is introduced to Miss Elizabeth Scott, the architect. Lower right, His Royal Highness can be seen making his speech at the opening of the Memorial Theatre.

Hold Off Old Age

By Being Reasonably Active and Keeping Ahead Of Times

It has been said that a sure sign of old age is when one lives entirely in the past, and ceases to look ahead. The moral is that one should retain an interest in things of the present and plan for the future if one would delay the coming of old age. One may be old in body and yet young and active in mind, and the younger and more active in mind, the younger and more active the body will likely be.

One cannot, of course, indefinitely stall off old age, but one can retard its approach by making the most of one's physical and mental powers.

There is a tendency on the part of many people, as they become elderly, to slow up more than they likely will warrant. They seem to feel that if they were to remain reasonably active in body and mind they would hasten the infirmities of old age and shorten their days. They fail to realize that reasonable activity is the very essence of life. If one has an unsatisfactory life and seeks to keep abreast of the times one will catch and retain much of the spirit that animates youth and growing old will be a slow and delightful process for all concerned. We don't believe that grandfathers should try to be shells or grandmothers seek to be flappers. Such aspirations are not dignified nor becoming, and tend to confirm the suspicion that the aspirants are in their second childhood. But elderly people may retain their freshness without becoming kittenish.—St. Thomas Times-Journal.

Just Curiosity

Some Excuse For This Postman Losing His Temper

Postman—A package for Mrs. Golden? Will you please come down and sign for it?

Voice From Above—Wot kinda package?

Postman—A large one.

Voice From Above—From who comes it?

Postman—From a Mr. Steinberg.

Voice From Above—From where?

Postman—Will you please come and sign for it?

Voice From Above—Wot's in de package?

Postman—I can't tell you, madam, I don't know.

Voice From Above (in a surprised tone)—You can't tell me what's in de package?

Postman (losing all that was left of his temper)—No, madam, I can't.

Voice From Above (sneaky)—Well, you'll hear from me tomorrow, Mrs. Goldenstein ain't home.

Great Bear Lake Minerals

Many Claims Have Already Been Staked And Great Activity Shown

According to reports reaching Ottawa, a great many mineral claims have already been staked in the area adjacent to Great Bear Lake, North West Territories, and there is every likelihood that many more will be staked this summer. Some prospectors have already gone in by aeroplane and others are planning to go in by water transport as soon as the ice goes out. In view of this great activity the Topographical Survey, Department of the Interior, Ottawa, has reprinted the manual respecting the survey of mineral claims in Dominion Lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

George: "Last night I met a girl who had never been kissed."

Bill: "Impossible! I should like to meet her."

George: "But she doesn't exist—now."

Four new minerals have been added to the list of materials of which the earth's crust is made.

Report Of Committee Favors A Nationally-Owned Radio Broadcasting System For Canada

The Useful Book Shelf

Can Be Fitted Into Narrow Or Irregular Spaces

Book cases have a peculiar power to create a cosy atmosphere in even a severe room. They provide interest and character with bare and there a touch of bright color in the book bindings. Although the glass-fronted cases protect the contents from dust, the open shelves are really the more inviting, especially in the living room, which is the logical place for the family's collection if there is not a separate library in the house.

Built-in book shelves take up little or no space. Where there is a fireplace the projection of the chimney leaves shallow places on each side in which book cases seem particularly appropriate. They may be placed to advantage on either side of a door or window of the room or singly under a high window. Filling up one end of a room with books creates a refreshing change from the usual four walls.

One of the decorative advantages of book cases or shelves is that they fit into narrow or irregular spaces. An attractive shelf may be fitted in between two windows in a small space where no other form of decoration is possible. An unexpected "jog" in a wall may take on very charming appearance if it houses a set of shelves.

Hanging book shelves, small and compact, may be placed in the most handy position for use. They are especially desirable in the kitchen where they will hold cook books and such. If they are bought unfinished they may be enameled to suit the homemaker and fit in with the other things in her workshop. In the living room or bedroom they will keep for handy reference those book friends that are dearest to the heart.

Atlantic Salmon For Coast

Salmon Eggs Are Shipped From New Brunswick To California

Carried all the way across the continent, 28,000 Atlantic salmon eggs shipped from the Miramichi hatchery of the Dominion Department of Fisheries under an exchange arrangement with the State of California, arrived at Big Creek hatchery, California, in A-1 condition, and before long the baby salmon will be seeing how they like Pacific coast waters for a home instead of the streams and sea of their ancestors.

It's a week's trip by rail from Miramichi, New Brunswick, to California, some 4,000 miles—and the prime condition of the eggs on their arrival testified to the efficiency of the packing case and methods used by the Fish Culture Branch of the Fisheries Department.

The eggs left the Miramichi hatchery at South Esk on February 29, and began their railway trip from New Brunswick a few hours later. They reached Big Creek on the other side of the continent on March 8, making the trip in one of the special cases used by the Fish Culture Branch for shipments of this kind—a case insulated with dry moss and having a tilted ice box at the top to serve the double purpose of preventing the temperature from mounting unduly and helping to maintain sufficient moisture in the double tray holding the eggs. At Montreal and Edmonton, and again at Vancouver, the eggs were watered, and on their arrival at Big Creek the California fish culture officers reported them as being in "excellent condition."

In exchange for these Atlantic salmon eggs the State of California is supplying the Dominion Department with a corresponding number of steelhead eggs which will help to add further to the stocks of steelhead in British Columbia waters.

Curtailed Train Service

Branch Line Reduction Made Only In Interest Of Economy

The Canadian Pacific and Canadian National have reduced their services on branch lines entirely from an economic standpoint, the railway and shipping committee of Commons was told. Hon. R. J. Manion, Minister of Railways and Canals emphasized that he had never been consulted on the matter of cutting off train services in branch lines and elsewhere.

"There is a general feeling in the west and elsewhere," said A. L. Beaubien (Lib. Provencher), "that the C.N.R. is losing its train miles much more than the C.P.R." It was felt that the C.N.R. had been forced to give way to the C.P.R. by the government.

The minister denied this absolutely. He had never been consulted.

"Are you going to take this lying down?" boomed the candidate.

"Of course not," said a voice from the rear of the hall, the shorthand reporters are doing that."

Self-made Man: They say that it takes three generations to make a gentleman.
Sarcasm Miss: Your grandson will be all right then.

Canada will have a nationally-owned radio broadcasting system if the report tabled in the House of Commons is implemented by parliament.

Highlights of the report are: Establishment of a chain of high-power national stations located at suitable intervals across Canada, their exact position to be determined after a careful technical survey.

Appointment of a federal commission of three, with assistant commissioners for each province, "to carry on the business of broadcasting."

Establishment of trans-Canada cable broadcasting as "one of the first duties of the commission."

Advertising to be limited to not more than five per cent. of each program period.

Location, where required and under private ownership if desired, of as many stations of 100 watts or under as may be deemed necessary for complete coverage.

All revenues from license fees and advertising to be expended in the interests of radio, and license fees to be fixed by the governor-in-council.

The report, which was brief and left the working out of details to the present radio broadcasting stations in the following words:

"They entered as pioneers in a field of service in the art of radio and under trying handicaps and sacrifices, worthily kept pace with a science fraught with ever-changing improvements and developments, and rendered this service under handicaps, which is most praiseworthy."

The committee expressed the belief, however, "that the present system, excellent as it is in certain respects, does not meet the requirements in quality and scope of broadcasting to insure its maximum benefits."

The report, presented by Hon. Dr. Raymond Morand (Cons., Essex East), bears the endorsement of the entire committee of nine members.

Seed Oats From Alberta

Further Supply Has Been Ordered

For Saskatchewan Areas

Further shipments of seed oats will be made from Alberta to the drought-stricken areas of Saskatchewan, according to G. M. Stewart, district inspector of the Dominion seed branch in Calgary.

Some time ago one million bushels of seed oats were shipped from the Peace River area to Saskatchewan. The further shipments will be made from other parts of Alberta only as the surplus supply of seed oats in the Peace River district has been used. Mr. Stewart said a request has been received from Saskatchewan authorities for additional supplies of seed oats. The previous shipments having been insufficient.

Saving Canada's Antelope

Interesting Chapter In The Story Of Wild Life Conservation

The history of Niemilank National Park, Alberta, Canada, is an interesting chapter in the story of wild life conservation. Overcoming what appeared to be insurmountable difficulties, forty-two antelope were enclosed in a fenced-in area in southwestern Alberta in 1915, and in contrast to previous experiments, continued to thrive in captivity. Their welfare and propagation, which at first was a matter of speculation, now seem to be definitely assured, as officials of the National Parks of Canada, Department of the Interior, report that the herd now totals 425.

Rest For The People

A city congregation presented their minister with a sum of money and sent him off to the Continent for a holiday. Soon after, a gentleman, just returned from the Continent, meeting a prominent member of the congregation, said, "Oh, by-the-by, I met your minister in France. He was looking very well—he didn't look as if he were needing a rest!"

"No," came the dry response, "it wasn't him, it was the congregation that was needing the rest."

The oldest oak forest in Europe is standing in Oldenburg, North Germany. The trees date back to the Middle Ages.

Glasgow, Scotland, may increase fares on municipal buses.

"Master, I've found lion tracks in the north."
"Good, let us go south immediately."—Hummel, Hamburg.

Norman Campbell Department Store Anniversary Sale

We Are Celebrating Our First
Anniversary With a
GREAT SALE
Commencing Friday, June 3

Our Buyer has been in the Eastern Markets, and has found many manufacturers ready to Sacrifice their products for cash. The savings he effected are being passed on to you in the Biggest Sale the District has yet seen. This is your opportunity.

A Bargain for Every Member of the Family

Posters are now in the mails for Mens, Ladies, and Childrens Wear and Dry Goods Specials. All Merchandise Reduced for a Quick Selling.

LACOMBE PUBLIC LIBRARY
During the month of May, over 200 books have been loaned from the Lacombe Public Library. On Saturday last "Magnificent Obsession" by Lloyd C. Douglas and "The Wild Orchid" by Segrid Undset, both much talked of new books were placed on the shelves and we have several more on order. A number have joined during the month, but we would like to see more taking advantage of the library and incidentally helping it on.

It costs nothing to come in and look over what we already have. All members are being asked to bring their lists of requested books with titles and authors name, and place them in a box, which will be on the table next Saturday during library hours from 5 to 8 and 7:30 to 8:30.

CARD OF THANKS
We wish to thank all those who so kindly sent flower and presents and helped during the illness and death of Willie.

Mr. and Mrs. Lee Forch, Mildred and Dorothy.

WILLIAM M. M. TOUCHER
Graduate
Chicago Musical College
Will resume teaching at his Lacombe residence with the opening of school in September. Teacher of Myrtle Cochran, Nina Bagley, Kathleen Campbell, Byron Hanson, and other talented and widely known students. Arrange for time now.

Address, Lacombe

Saturday, June 18th
It is quite probable that the Annual Sunday School Picnic will be held on this date. Please keep it in mind and watch for further announcement.
Sunday, June 26th. Plans are being made to hold a "Flower Service" on this date. Watch for next week's announcement.
Monday, July 4—Saturday, July 8 are the dates for the Sixth Annual Diocesan Summer School at Banff. The following is a quotation from a letter recently received from Archdeacon Swanson, Secretary of the Summer School: "In addition may I say that Bursaries will be refunded provided that notice of cancellation is received within a week of the opening of the School."

Town Notes

Harrison Allen, son of Mr. and Mrs. Chas. R. Allen, of Calgary, was killed on Sunday at Bowden, Colo., in an auto collision.

The names of the winners in the contest run by Rainbow Cleaners will appear in next week's Globe.

Don't forget the Silver Tea to be held at the Golf Club on Wednesday, June 8th. Everyone is welcome. Now is the time to see the Course at its best.

\$240.00 is the price of the New General Electric Refrigerator. \$10.00 down, balance on easy terms. See Morrison and Johnston, Ltd.

The list of western winners in the Irish Sweepstakes, was published on Monday. Sorry to say, no ticket holder from Lacombe appears in the list.

Mr. and Mrs. Hugh Reed announce the engagement of their eldest daughter, Kathleen Rebecca, to Dr. Gordon Charles Johnston, of Edmonton, the wedding to take place in June.

The regular meeting of the W.I. will be held at the home of Mrs. R. Watson, on Saturday, June 4th, at 3 p.m. Hostesses: Mesdames H. Reed, W. Howard, W. Anderson and R. Bullis.

Alberta Olympic Track and Field Trials will be held in Ponoka on June 8th, under the Auspices of the Ponoka Sports Association.

Mrs. Jas. White is opening a Ladies' Dress and Novelty Shop in the building next to the Fraser-Macdonald Agency. Mrs. White is an expert dress-maker and is prepared to do dressmaking and sewing of every description. Call around and see her about your requirements and you will be pleased with her work.

Fortune Cup Inn is a new place of business being opened to the public at Gull Lake this year by Miss Bon-rea and Mrs. Palmer, who with their talents and experience in tea-cup reading and very pleasing personalities, will without doubt be kept very busy this summer.

Follow the crowd to the Rainbow Cleaners on Saturday, June 4th. There will be three lucky persons in that crowd.

Conet R. James, R.N.W.M.P. has his headquarters in the house until recently occupied by Mrs. Wm. Burrie, on Day St., Mrs. Burrie has moved into her cottage on the Avenue.

Blinded by lights from an approaching car, Wm. Hart, painter of Lacombe, drove his auto over the bank this side of the Blackfalds bridge on Saturday night last. Broken glass from the windshield cut Mr. Hart's face so badly that medical aid was necessary, but no serious results are anticipated. The three other occupants of the wrecked auto escaped with a shaking up. The fenders and top of the Hart car were badly damaged.

While fooling with a 22 rifle on Sunday, seven-year-old Willie Fitchuck shot and killed his eight-year-old cousin Helen Bokonek, at Willington, the bullet entering the back of her head, causing instant death.

To the Ladies—Let us do your cleaning and pressing. Silks are our favorite pastime. Rainbow Cleaners.

Winners of last week's awards in the final Snapshot Contest: 1st, Miss Stuart, Lacombe; Miss Lois Gee, Ponoka; 3rd, Miss Iva Hunt, Olive. Honorable mention to Mr. D. Szegien, Tees and Leslie Groggy, Rimbye. The above receive a beautiful enlarged picture from the snapshot entered, and the snaps entered in the National Master Snap Contest. Enter some of your choice snaps. Cameron Studios and Associated dealers.

Mr. L. Sandbrook has opened up his ice cream parlor and tourist hut at Gull Lake, and would like a visit from his many friends. He has redecorated his ice cream parlor and it is now a bright and cheerful place. The tourist bedrooms above have also been renovated, and he has installed a kitchen and dining room for the use of those occupying the rooms. The kitchen is fully equipped with every culinary utensil, and complete sets of dishes are at your service in the dining rooms. The rooms are to be rented at the very reasonable rental of 50c a day, which includes the use of the kitchen and dining room. Mr. Sandbrook invites every one to visit and inspect his place and he feels sure that the accommodation provided will appeal to the public.

A very large number of members turned out on Monday evening last to receive an official visit from M.W. Geo. W. Kerby, Grand Master Grand Lodge of Alberta, A.F. & A.M. The ladies of the Eastern Star held a banquet in the Church Hall, on the same evening.

The Annual Bull Sale, held yesterday here, was very successful. In spite of the depression and shortage of cash, the prices were fair, but not as high as last year. The quality of all animals offered was of a high

standard. Bidding was slow at times and many really outstanding bulls were sold very reasonably. A full account of the sale will appear in next week's issue.

P. O. Vickerson attended the annual Stettler Golf Tournament on Thursday, May 26th and enjoyed a good time. He won second prize in the consolation of the second flight. About forty players took part in the tournament. Outburst of Coronation won the medal round, and G. L. Willis of Stettler won first in the first flight.

FEEDERS DAY, JUNE 10
The Lacombe and District Board of Trade are arranging a Feeders' Day for Friday, June 10th, in the feed lots of the Lacombe district. The past season's feeding operations were very successful from both the ranchers' and the feeders' standpoints. The object of Feeders' Day is to bring together the ranchers and farmers who may be interested in the scheme where range cattle are wintered and finished on the farm. It would seem good business for all concerned to have more cattle fed in the district.

The program calls for a full day of feeding. Cars will leave the Experimental Station at ten o'clock in the forenoon and call at A. Gil-mour's to see a fifty acre field of alfalfa and arrive at C. Abbott's at eleven o'clock where the ladies will arrange a picnic lunch while the men review and discuss Mr. Abbott's steer feeding operations. The farms of Messrs. Day, Meldrum and Wilson will be visited during the afternoon, while pictures of cattle feeding operations, raising scores, etc., will be shown at the Avalon theatre during the evening.

A number of prominent men interested in the different phases of the project will be present to take part in the discussions which will arise in each feed lot. Those who are feeding cattle will be prepared to discuss such points as methods of feeding, kinds of feed used, and gains made by the cattle under feed.

Every one interested is invited to come and meet this day of both pleasure and profit. A committee of ladies are looking after the lunch and would like those who can to bring a picnic basket.

ALBERTA COUNTRY DISTRICTS GOLF ASSOCIATION

The Tournament will take place this year with some slight changes. In the past years, the winners in the sixteen districts, which makes up the Association, staged the finals in Calgary. This year, when District winners are declared, preliminary tournaments will be held in four sections. The winner in each, that is four in all, go to Calgary as the guests of the Herald, to play a three-hole hole match, medal play for the championship. The four sectional tournaments will be eighteen hole matches, medal play. The Herald hopes in the future to revert to former system and bring the sixteen district winners to Calgary for the playoff. The dates arranged for District No. 7 are as follows:
Lacombe, 5th June, 1932.
Red Deer, 12th June, 132.
Didsbury, 19th June, 1932.
Innisfail, 26th June, 1932.

All members are asked to take part in these eighteen hole matches, medal play. Play will commence at 1:00 o'clock p.m., St. Andrew's Rules to govern.

One of the sectional tournaments will be held over our course, the date to be announced later.

A. Belcher, Convenor, District No. 7

GULL LAKE REGATTA TO BE HELD JULY 20th

With the Wigley Marathon Swim again on the programme for the 1932 Regatta to be held at Gull Lake on Wednesday, July 20th, and the motorboat and Canoe Championships being retained, plans are we under way to again show the crowds that we have "Swimmers equal to any in Alberta." Speedboats every bit as fast as those on the Eastern Lakes or at the Coast, and Canoes as good as anything on the North American Continent. The regatta, held last season, and will be more than proved this year.

While Calgary did not make the best showing in the swimming events, most of the ribbons going to Edmonton South Side last year, we are informed that the Y.M.C.A. Poothills Ladies' Swimming Club, and Calgary Men's Swimming Clubs have been going through rigid training since last season, and are booked to turn the tables on the Northern contingent this season.

Calgary, Banff and Edmonton held honours about even in the canoe events last season, but since then Jack Porter, the chief of the Calgary Squad has returned to the East, where with the Balmy Beach Club, he is expected to go far in the coming Championships at the Olympic Games. However, Calgary will still have some worthy contenders left, and after seeing them go through their paces up Bowness way, we expect them to offer some resistance to the Edmonton Voyageurs Canoe Club, who will however be in dandy shape, so about sixteen of their members are holding a Canoe Marathon of two hundred miles down the River from Rocky Mountain House to Edmonton on July 1st and 2nd, and the Standish, Wood, Duncan aggregation from Banff will likely give them both a merry run for their money.

While in the Outboard Motorboats, Ted Madge, present cup holder, will have some opposition from Vic Hor-

News Sensation! \$5.80

Is the price of a first quality Goodyear Tire with Pathfinder tread ... Not a "special" ... not a "second" ... but the real thing, a standard quality Goodyear tire made with Super-twist Cords, and fully guaranteed.

Don't let the day pass without getting rid of your dangerous old tires. You'll save money in the end, and a lot of grief, too, by getting new Goodyear tires now at the new sensational low prices.

ner, Ted George and others, if what we hear about their new boats is right.

Loud speakers have been arranged for and all of ten thousand spectators are able to see and hear the entire programme.

In addition to the Championship Races, there will be Novelty events of all kinds and an exhibition in life saving.

The programme will commence at 1:30 sharp.

MISS STELLA M. GARLAND DEAD

Mr. and Mrs. A. Belcher received word on Saturday last of the death of their niece, Miss Stella Marion Garland, daughter of Mr. and Mrs. Delmer Garland, at her home in Los Angeles, following an operation. Mr. and Mrs. Garland have the sincere sympathy of their many friends in Lacombe.

GOLF NOTES

The attention of all is called to the fact that there will be a Silver Tea at the Club House on Wednesday, June 8th. All those who are interested are cordially asked to be present.

Golfers are asked to notice the fact that if they play on Friday afternoon, their scores must be handed in at once to the Tournament Committee. If you cannot play then, the score for the first game played after noon on Friday is to be given. All scores must be in by Tuesday.

There will be a Tea as usual on Friday, June 3rd. The Hostesses for this tea will be Mrs. Barney Halpin, Mrs. Fraser and Mrs. Vanvoosen-hove.

The hostesses for the Tea last Friday were Mrs. Winters, Mrs. Fitzpatrick and Mrs. Morrison.

There will be a mixed foursome, approaching and putting and long driving competition.

If there are any Bridge Members who have paid their dues and have not yet received their cards will they please notify Margaret Morrison on Friday. It is important that all members have their cards.

AT THE AVALON
"The Cisco Kid"
Back in the nineties, Arizona was

an exciting spot to live in, with the notorious Apache Kid and his ilk making life interesting for the traveler on stage or horseback. Today the outlaw and the landit have gone and the airplane and the auto have replaced the stagecoach—with a considerable lessening of romance. Something of this adventurous bygone era is recaptured in O. Henry's "The Cisco Kid". With Warner Baxter as the Cisco Kid, a gay and reckless border rascal, Edmund Lowe as a cavalry sergeant bent on winning the reward on the Kid's head, and Conchita Montenegro as the Mexican dancer who intrigues both men but loves only one, the film is crammed with action and surprises as well as with a dual love-story in which Nora Lane as a courageous pioneer woman plays an important part.

See this picture at the Avalon this week.

THREE DROWNED AT ALBERTA BEACH

Edmonton, May 29—Plunged into the chilly waters of Lac Ste. Anne when the sailboat in which they were riding capsized off Alberta Beach during a high wind prevailing throughout the day, George Latham, Edmonton School Board engineer and prominent leader of Labor interests in this city, Sidney Fowler, also of this city, and Oscar Mueren, Alberta Beach, were drowned, while Ruth Latham, J. Tyrrell, carpenter, also of this city, the fourth member of the party, was saved.

CARD OF THANKS

We wish to thank all our friends who so kindly assisted us in so many ways during the long illness and since the death of our beloved mother. Special thanks to those who sent flowers.

Mr. and Mrs. C. Heathcote,
Mr. and Mrs. J. Peck,
Mr. and Mrs. C. Bauer,
Mr. and Mrs. A. Bauer,
And Raymond and Lloyd.

NOTICE
Divine Service will be held in the Joffre Hall, on Sunday evening, June 5th at 7:30. Good music and solo. Be sure and come.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form,
of the Bank's
SEMI-ANNUAL STATEMENT

30th April, 1932

LIABILITIES

LIABILITIES TO THE PUBLIC

Deposits	\$626,701,081.70
Payable on demand and after notice	
Notes of the Bank in Circulation	35,143,569.00
Payable on demand	
Bills Payable	243,816.18

Items which do not come under the foregoing headings	
Total Liabilities to the Public	\$672,310,882.08
LIABILITIES TO THE SHAREHOLDERS	
Capital, Surplus and Undivided Profits & Reserves for Dividends	76,301,599.13
This amount represents the shareholders' interest in the Bank, over which liabilities in the public take precedence.	
Total Liabilities	\$748,612,481.21

RESOURCES

To meet the foregoing Liabilities the Bank has

Cash in its Vaults and in the Central Gold Reserves	78,491,119.01
Notes and Cheques on Other Banks	23,808,742.70
Payable in cash on presentation	
Money on Deposit with Other Banks	27,639,150.51
Available on demand or at short notice	
Government & Other Bonds and Debentures	228,901,146.79
Gold and Securities the greater portion of which matures at early dates	
Stocks	601,473.59
Railway and Industrial and other stocks	
Call Loans outside of Canada	20,262,324.53
Secured by bonds, stocks and other negotiable securities of greater value than the loans and representing monies quickly available with no disturbing effect on conditions in Canada	
Call Loans in Canada	5,645,610.62
Payable on demand and secured by bonds and stocks of greater value at current quotations than the loans	
Bankers' Acceptances	133,657.89
Prime drafts accepted by other banks	
TOTAL OF QUICKLY AVAILABLE RESOURCES (equal to 57.34% of all Liabilities to the Public)	\$385,463,225.66
Other Loans	336,572,388.88
To manufacturers, farmers, merchants and others, on conditions consistent with sound banking	
Bank Premises	14,500,000.00
Three properties only are carried in the names of holding companies; the stock and bonds of these companies are entirely owned by the Bank and appear on the balance sheet in full value. All other assets of the Bank's premises, the value of which largely exceeds \$1,000,000, are year under this heading	
Real Estate and Mortgages on Real Estate	1,775,736.03
Acquired in the course of the Bank's business and in process of being realized upon	
x Customers' Liability under Letters of Credit	8,478,952.18
Represents liability of customers on account of Letters of Credit issued by the Bank for their account	
Other Assets not included in the foregoing	1,802,178.46
Making Total Assets of	\$748,612,481.21
to meet payment of Liabilities to the Public of	\$672,310,882.08
leaving an excess of Assets over Liabilities to the Public of	\$76,301,599.13

PROFIT AND LOSS ACCOUNT

Profits for the half year ending 30th April, 1932	\$2,599,292.70
Dividends paid or payable to Shareholders	\$2,160,000.00
Provision for Taxes, Dominion Government	228,316.28
Reserve for Bank Premises	100,000.00
	2,488,316.28
Balance of Profit and Loss Account, 31st October, 1931	1,103,426.95
Balance of Profit and Loss carried forward	\$1,204,403.37

The strength of a bank is determined by its history, its policy, its management and the extent of its resources. For 114 years the Bank of Montreal has been in the forefront of Canadian finance.

Bentley News

Born at the Bentley Hospital on May 20th, to Mr. and Mrs. Robson, of Rimby, a son.

The Bentley ceremony is well under construction. The same work is well up. The ballers, etc., will be installed shortly. The building will be completed in two or three weeks time.

Bentley is to have new tennis courts, also a bowling green, being constructed near the Community Hall. Two cat loads of Bentley golfers went to Lacombe on Sunday and played around the course.

Mr. Des Finch, telephone agent, has been sick for the past few weeks, but is around now.

The next ball game in Bentley will be on Friday night, Bentley vs. Morningdale. Everybody turn out and support your team.

Mr. and Mrs. H. Geddes and Mrs. Walter C. Smith of Edmonton, were visitors at the home of Mr. and Mrs. F. Johnson, over the week end.

Construction work on the new Red and White store is well under way. The cement work is about 4 feet above the ground.

Miss Theresa Sigel, of Calgary will give a recital in the United Church on June 3rd. Everybody come. This recital is sponsored by the Ladies' Aid.

The Bird Drug Co., has installed a most up-to-date code fountain service, to be opened this week. Come and look it over.

Miss Gwen Halpin, R.N. has returned to her home in Lacombe for a while.

Mr. and Mrs. C. Hergott and Mr. Wilkie, motored to Edmonton over the week end.

Mrs. Freeman returned to her home in Calgary on Sunday. She was a patient in the hospital here for a few weeks, and was also visiting with Mr. and Mrs. Bert Thorpe.

Mr. Jack Summers, of Edmonton, is visiting with his brother, local Atlas Lumber Agent. Mr. J. Summers is in charge of the building of several cottages at Gull Lake, and was formerly factory manager of W. H. Clarke Co.

Miss Marion Halpin will do hair dressing in Bentley any time. Please leave orders at the Hospital. Miss Halpin has completed a course with one of the best hair dressers in Calgary and is prepared to do all kinds of hair dressing, marcelling, facials, etc.

One of the largest crowds in history attended the dance at Bentley Friday to greet Billy Adams and his "Melody Crew." Everyone who attended was more than pleased with the excellent music supplied by this band. The members of the orchestra, themselves, were great entertainers as well as fine musicians. The singing by Billy Adams was exceptionally fine, as were the duets by Harry Hovey and Hobart Cowen. The hot choruses and solos by the various members of the band were brilliantly played. In the beautiful waltzes played, the pianist switched to the piano-accompanied and thrived the large crowd with his mastery playing. Taking the dance all around, it was a decided success, from the standpoint of the dancers, the spectators and the orchestra. Everyone present with Captain Adams and his "Melody Crew" the best of success.

DEATH OF MRS. TENNISON
Died at Dakin, Alta., May 29, 1932. Mrs. Jane Tennison, aged 84 years and 2 months. Deceased was born in Nova Scotia and leaves five living children: Mrs. Oliver Stanchfield, Dakin, Alta.; Miss Louis Baldwin, Clive; W. F. Tennison, San Bernardino, Cal.; J. C. Tennison, Elk River, Minnesota; A. N. Tennison, Cedar, Minnesota. Deceased lived in vicinity of Clive for over 30 years.

BANK OF MONTREAL
REPORTS CONDITION
OF MARKED STRENGTH

The semi-annual statement of the Bank of Montreal, as of April 30th, shows a very strong exhibit. The outstanding features are represented by an increase in the holdings of gilt-edged securities, a gain in liquid assets to an amount equal to 87.34 per cent. of liabilities to the public—evidence that the bank is in a position to meet any increase in the requirements of its many customers.

The statement, in easily understandable form, appears elsewhere in this issue and affords an opportunity of obtaining a comprehensive view of the Bank's strong position.

Total assets are reported at \$748,612,481, compared with \$786,897,706 a year ago. Of this amount quickly available, or liquid, assets are \$385,463,225. Included among these liquid assets is cash in vaults and in Central Gold Reserve amounting to \$78,491,119, equal to 10.67 per cent. of public liabilities.

Increase in Bond Holdings
The most important change in liquid assets is represented by an increase in government and other bonds and debentures to a total of \$228,901,146. These are recognized as gilt-edged securities, the greater portion of which mature at early dates. Included among them are Dominion and Provincial government securities of a value of \$174,780,246 up from \$149,229,626 a year ago.

Call loans outside of Canada are \$20,262,324 and are secured by bonds, stocks, and other negotiable securities of greater value than the loans and represent monies quickly available without any disturbing effect on conditions in Canada.

Call loans in Canada secured by bonds and stocks of greater value at current quotations than the loans stand at \$5,645,610, as compared with \$11,347,487, at the same date last year.

The total current loans made to manufacturers, farmers, merchants and others, is reported at \$336,572,388.

Deposits have held up remarkably well under prevailing conditions. Total deposits are reported at \$626,701,081.

Total assets of \$748,612,481 are available to meet payment of liabilities to the public of \$672,310,882, which leaves an excess of assets over these liabilities of \$76,301,599.

Profit and Loss Account
The profits for the six months amounted to \$2,599,292.70 as compared with \$2,771,753.71 for the corresponding period last year. The profits were distributed as follows: dividend, \$2,160,000.00; provision for taxes, Dominion Government, \$228,316.28; reserve for bank premises, \$100,000.00, leaving a balance of \$1,204,403.37. This when added to the balance carried forward, at the end of the fiscal year brought the total at the credit of profit and loss to \$1,204,403.37.

SESSION ENDS
OPTIMISTIC FOR
EMPIRE HEARD

Ottawa, May 26.—A vice-regal salute of 19 guns boomed out on Parliament Hill today. As the smoke cleared away from the lowering skies and a cavalry detachment clattered away toward the city, the third session of Canada's 17th Parliament came to an end.

Without the fuss and feathers of an opening, Chief Justice P. A. Anglin of the Supreme Court of Canada, in the absence of Lord Bessborough, the Governor General, read the speech from the throne which liberated members and senators from their official duties and closed the legislative mill. Galleries were crowded.

Officers of the navy and army, resplendent in blues, crimson and gold braid, emphasized the deep red of the Senate chamber. Prime Minister R. B. Bennett, Hon. Arthur Meighen, Government leader in the Upper House, and Chief Justice Anglin added an old-world touch in their gold-embroidered uniforms. Members of the Commons in sombre black gathered at the bar of the Senate in orderly disorder.

In low tones, the chief justice read the throne speech, first in English, then in French. It expressed the belief the Imperial Economic Conference would develop a power "which will bring enduring harmony out of economic chaos" and herald a new dawn for a stricken world. Its language from beginning to end was couched in optimistic phrases.

The Commons convened a few minutes before the time set for proclamation to listen to a statement by Hon. Charles H. Cahan, Secretary of State, on war reparations.

Three loud knocks on the door heralded the approach of the gentlemanly member of the Black Rod, official intermediary between the two houses of Parliament. The State Secretary was in the middle of a sentence but the deputy of the King could not be kept waiting. Mr. Cahan closed off his statement. Black Rod was admitted—a carefully guarded prerogative—and the Commons "consented" to appear in the Senate chamber.

Ceremonies in the Upper House were brief. After reading the throne speech, the Chief Justice and the escort of officers trooped from the chamber. The House boomed. The travelling detachment from the Princess Louise Dragoon Guards escorted the Chief Justice toward the city. Members and senators hid each other adieu and dashed for taxicabs and trains. The session was over.

The Greatest Legacy of the Canadian people to the next generation ...is life insurance

When the Sun Life began business in 1871 life insurance in Canada was \$13 per capita.

TODAY it is \$635 per capita. With one exception, Canadians are now the highest insured people in the world.

The Sun Life has played a leading part in fostering this thrift in the Canadian people and in protecting Canadian homes.

The rapid growth of the Sun Life is shown in the following table:

ASSURANCE IN FORCE

1871	\$404,000
1881	\$5,010,000
1891	\$10,436,000
1901	\$68,400,000
1911	\$164,578,000
1921	\$536,718,000
1931	\$3,051,077,000

NOT MERE VERBIAGE

Mr. De Valera, submitting to the Senate his bill for abolition of the oath of allegiance to the British Crown, claimed on Wednesday that the purpose of the bill was not to bring about severance of the Free State from the British Commonwealth, but merely "to put it in its proper place as an international instrument." The objection to the oath was that it made the Anglo-Irish treaty of 1921, a fundamentally domestic law.

There is a similarity between the tactics of Mr. DeValera and those of Mahatma Gandhi, in the sense that both aim their words to their company. Gandhi speaking to the All-India National Congress is not the same Gandhi who used his persuasive powers on the Second Round Table Conference and the De Valera who said to the Irish Senate, "See how innocuous the whole thing really is!" differs, we feel sure, from the De Valera who has played for years upon the nationalism of his more fanatical countrymen.

It must be admitted by all honest persons, irrespective of their racial prejudices and their attitude toward the specific question of Irish allegiance, that the question of the oath goes a little deeper than a mere matter of legislative verbiage. The strongest case for the abolitionist, as we see it, is that the oath of allegiance symbolizes in the minds of many Irishmen a subservience which in practice has wholly ceased to exist and that its removal would discard the last vestige of British domination over Ireland. There is, also, the fact that an extorted oath of allegiance is a contradiction in terms.

On the other hand, those who point to the past and to the biots upon British administration in Ireland which that undoubtedly contain, are—we are convinced—pointing to conditions which will never recur. Ireland has known terrorism by the Anglo-Saxon, she has known the curse of landlordism and the bitterness of want—but these things belong to a past which Irish and English alike would profit by forgetting. The oath of allegiance conforms in its essence to the new concept of the British Empire—as a symbol of willing homage to an Empire ideal.

Tenders for the position of policeman and Public Works man for the Village of Gull Lake for the two months beginning June 25th and ending August 25th. A team of horses and farm wagon to be supplied with which to take care of the roads.

The tenders to be in the hands of the undersigned not later than June 15th.

The lowest or any tender not necessarily accepted.

D. F. Chisholm, Secretary
Lacombe, Alta., May 30th, 1932.

"NEW BROOMS"
Presented by the Canadian Players on the First Night.
"New Brooms" sweeps up a lot of laughs. Millions of humor and keen, good-natured observation of human nature mark this realistic comedy. Critics proclaim it a vast entertainment.

Chautauque Opens at Lacombe on WEDNESDAY, JUNE 22, and ends on Saturday, June 25th. There are seven complete programmes. Get a season ticket and do not miss a programme. Season Tickets \$2.00.

Peerless White House Paint \$2.50 If its cleaning and pressing we'll per gallon at Morrison and Johnston, do it and do it right. Rainbow Ltd. Cleaners.

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation—
When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made especially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

CASTORIA
CHILDREN'S CASTORIA

WORLD HAPPENINGS BRIEFLY TOLD

Lord Irwin, former-viceroy of India, said he was encouraged with the spirit of optimism in western Canada.

Prince Peter of Montenegro, brother of Queen Elena of Italy, died recently at Bolzano, Italy.

Green peas, the seed of which are said to have come from King Tutankhamen's tomb, are being grown by M. Pejstrup at Pass Lake, Ontario.

The United States senate rejected a proposal for a year's suspension of military and naval armament construction.

There has been an increase of 180 head of cattle shipped to Great Britain, through Montreal port over the same period last year.

Manitoba, Saskatchewan, and Alberta government representatives will meet early in June to prepare statements for the forthcoming Imperial Economic Conference.

Captain Hilton H. Bailey, who with Simon Lake, the inventor of the submarine, hopes to raise the "Luftania," states actual work on the project will begin early this fall.

Commander F. W. Nelles has been appointed commander in charge of Halifax naval port, Commander V. C. Brodeur at Halifax now will go to Esquimaut.

It is proposed to form a pool for carrying on export business from Canada to Latin-America, to prevent Canadian goods losing their identity on passing through foreign States.

Winston Churchill, former Chancellor of the Exchequer, in an address recently, asked the United States and Great Britain to join forces in leading the world "out of these gloomy caverns into the broad sunlight of activity and progress."

If the Dominion Government assumes 75 per cent. of age pension costs, the City of Calgary will ask the Alberta Government to assume the 10 per cent. of the cost now borne by this city, according to a statement by Mayor Andy Davison.

Removes Speed Limits

Nova Scotia Protects Motor Drivers Up To Forty Miles

Nova Scotia has fallen in line with the trend to abolish motor speed limits and place the onus of responsibility on the driver. According to the new law, you can clip along at forty miles per hour and be protected by the act. If you have an accident when you are exceeding forty, then the burden of proof rests on you that you were driving carefully.

The legislation is interesting in view of the way they drive in Nova Scotia. There is hardly any paving down there, but gravel highways stretch for miles in all directions. These are well-surfaced, but are narrow, twisting and hilly. The Maritime drivers who along at terrific speed. The visitor cannot help wondering how it is there are so few accidents.

"A piano, sir? Certainly. You'd like a grand piano?"
"Grand!" replied the wealthy one, "I want a magnificent one!"

Acidity Overcome

Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything excepting Carter's Little Liver Pills," he blurted out. "Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels. Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and indigestion. 25c & 75c. red pills, everywhere. Ask for Carter's by NAME."

W. N. U. 1942

Canada's Largest Cities

Recent Census Indicates Several Changes in Relative Importance of Urban Centres

The latest official bulletin giving the population of the urban centres of Canada, as compiled from the census figures taken in 1931, shows several changes in the relative importance of cities as compared with 1921. The largest city in Canada is Montreal with a population within the corporate limits of the city, of 518,577, an increase in ten years of just over 200,000. The population of Montreal island, which covers a comparatively small area, is well over 1,000,000, for on it are such substantial cities as Verdun, which adjoins the City of Montreal, with a population of 60,745, an increase of 35,744 since 1921; Outremont, with 29,673; Westmount, with 24,235; LaSalle, with 18,630, and St. Lambert, on the south side of the River St. Lawrence, with 6,075.

Toronto, the capital of Ontario, situated on a bay of Lake Ontario, is the second largest city in Canada and has a population of 631,207, a gain of 109,314 in the last decade. Vancouver, British Columbia, is the third largest city in the Dominion, the place formerly held by Winnipeg, Manitoba, with 246,588 residents, an increase of 100,074. The city of Winnipeg now takes fourth place with 218,785 compared with 179,087 in 1921, a gain of 39,698. Then follow the 16 next largest cities in the order named: Hamilton, Ontario, with 155,477; Quebec City with 150,594; Ottawa, the capital city of Canada, with 128,872; Calgary, Alberta, with 82,761; Edmonton, Alberta, the capital of the Province, with 79,197; London, Ontario, with 71,148; Windsor, Ontario, on the Detroit River, opposite the City of Detroit, with 63,108; Verdun, Quebec, with 60,745; Halifax, the capital of Nova Scotia, with 59,275; Regina, the capital of Saskatchewan, with 53,209; St. John, the principal port of New Brunswick, with 47,514; Saskatoon, Saskatchewan, with 43,291; Victoria, the capital of British Columbia, with 39,082; Three Rivers, Quebec, with 35,450; Kitchener, Ontario, with 30,768 and Brantford, Ontario, with 30,107.

Marketing Board Plan

Proposal Will Avert Imperial Economic Conference Before Action

It Taken
The government's far-reaching proposal for a national farm products marketing board will await the Imperial Economic Conference before any definite action is taken to bring it into being. Hon. Robert Borden explained the ministry's plans in this regard in the House of Commons when the agricultural estimates were under discussion. Intense study has been given the problem, in which members from all parties in the House have joined.

As such a board, the plan it will put into effect, may have a tremendous influence on Canada's export trade. Mr. Borden immediately will appoint a commission of the best marketing experts he can find to give further study to the scheme in preparation for the Imperial Conference. One or two will be from the practice, some from central Canada and representatives from both Quebec and the Maritimes.

Lesson For Produce Growers

High Standard and Extensive Advertising Assures Good Market

Last year's harvest of lettuce growers in California and Arizona had a value of \$40,000,000. In ten years the cultivated area has increased the produce ten-fold. The Western Growers' Protective Association shipped fifty thousand car loads. The directors have business ideas. They keep the produce up to a high standard. They order care in packing. The shipping crates are lined with waxed paper and sent into studied markets. The buyers are assured of quality. The growers' association also has a good publicity department. This contrasts for \$200,000 worth of advertising to create a larger demand by acquainting readers with the healthful qualities of the vegetable. All of which should contain a moral for those who are in producing and marketing earth products.—Brandon Sun.

Need Western Spirit

"We should like to see more of the Western spirit in Eastern Canada," says Border Cities Star. It would be good for this end of the country and good, therefore, for the whole Dominion. After all, though conditions in our country are far from satisfactory, they are much better than in most lands, including the United States. And they are not any worse, indeed, they are not as bad as they have been in days of depression long since forgotten.

Could Be Arranged

"Jeannie, lassie," said an Aberdeen man to his daughter. "I've just had a visit from Tammie and I've consented to your marriage."
"Oh, but father," she blurted out, "I didn't want to leave my Mother."
"Hoosie, lassie," was the reply, "I didn't take that trouble ye; ye can take her wi' ye."

Light from a cloudy sky is equal to a brightness of 325 candlepower square foot.

Paradise For Fishermen

Once Beaver Lake In North Now Teeming With Trout

Trout fry placed in the heretofore barren waters of the Medicine-Maligne Lake system in Jasper Park by the fish culture branch of the Department of Fisheries, grew and multiplied so quickly that during the past summer fish as heavy as six pounds were taken by anglers and there seemed to be a limitless supply.

Using rod and line for test fishing in Maligne, Dr. Bajkow and Dr. Neave found sport "so good that three or four hours with one rod produced over 100 pounds of fish." In Beaver Lake which lies about a mile from the southern portion of Medicine Lake, "as soon as the spoon struck the water the trout rushed from all directions." In order to get some further idea as to the abundance of the fish the investigators set a 30-foot gill net in Beaver Lake. "Over 400 fish were caught in about two hours, so that most of the next two hours had to be spent in cutting the meshes of the net and releasing the fish into the lake again."

The trout are growing to be big fellows, too. The first fry put into the Medicine-Maligne system by the fish culture people were distributed in 1928. That's only three years ago, but a trout taken in Maligne Lake a few weeks ago tipped the scale at six pounds, an exceptional weight for a 3-year-old speckled trout.

Winnipeg Newspaper Union
Fashion

899

IT CATERERS FOR A SCARF EFFECT THAT WILL "STAY PUT"

Delightfully young and smart in this new slim-line model. Since crepe is plain and print is so charming, it was chosen for this fascinating model. It is light navy blue spotted in red. The soft crushed scarf collar gives it such distinction in plain white crepe.

Another ideal suggestion is plain crepe in soft beige shade self-trimmed. For summer wear, handkerchief linen prints, batiste prints and tubalins are nice mediums.

It is very simple to fashion, and the cost unbelievably small. Style No. 899 is designed for sizes 18, 16, 20 years, 26, 36, 40 and 42 inches bust. Size 16 requires 3 1/2 yards of 38-inch material with 3/4 yard of 38-inch contrasting. Price of pattern 35 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Brought Results Anyway

A Scot applied for a rise, stating that he was thinking of getting married. At the end of the week he found a substantial rise in his pay envelope. Some time later he met the manager on the stairs.

"I suppose you've settled down to married life now?" asked the manager.
"I'm married," replied the Scot.
"Not married," echoed the manager in surprise. "But didn't you apply for a rise because you were thinking of getting married?"
"Oh, yes," came the reply, "but I stopped thinking."

Isn't it true that a dollar will always buy more when you haven't got one?

Is Still a Mystery

No Trace Of Winnipeg Child Who Disappeared Four Years Ago

Torn and yellowed with time, a circular hangs on the bulletin board of Winnipeg's central police station offering a reward for information leading to the discovery of Julia Johnson, a little son of the dying colonel. Efforts of the police of the Winnipeg police to the recent kidnapping of Augustus Lindbergh, Jr.

Four years ago Julia, a laughing-eyed Polish girl, vanished from in front of her home as mysteriously as the little son of the dying colonel. Efforts of the police of the Winnipeg police to the recent kidnapping of Augustus Lindbergh, Jr.

No demands for ransom were received following Julia's disappearance. She was reported to having been seen in various sections of the city in the company of an old man. Police dogs were put on her trail and hundreds of citizens organized search parties which led into remote corners of Manitoba in a fruitless attempt to find a solution to her disappearance.

Julia would now be nine years old. Her parents still believe she will be found some day. Each year a candle is added in her home and the sympathy of at least one Winnipeg mother goes out to Mrs. Anne Morrow Lindbergh in the loss of her baby in a way that only a fellow sufferer can understand.

Collected Queer Articles

So-Called Pauper With Fortune In Bank Had Odd Hobby

Investigators in Hamilton, Ontario, probing the strange case of Abadias Mackle, the so-called pauper who died leaving a bank account of \$14,000 found themselves faced with the most baffling collection of articles ever seen outside of a museum today.

Mackle died over a month ago, apparently in penury, and was buried at the city's expense. Later it was discovered he had \$14,000 in the bank. Large packing cases were located in a storage warehouse, in Mackle's name, and were opened in the presence of witnesses.

Among the things found were: Nolegions of the Royal Scots, many years defunct; 300 rubber heels, old-fashioned handkerchiefs, rubber shirt fronts, a collection of 300 hats—cosmethe's hats, plaid caps, derbys which revealed every fashion from the 80's onward; a large assortment of keys for opening sardine cans, huge stocks of bedding, coat buttons, hairpins, powder puffs of yesteryear, soap spoons, patent eye testers, sample books of greeting cards, paper ice cream spoons and many other peculiar articles.

An Unusual Operation

Wood Alcohol Withdrawn From Man's Spine Restores Sight

An operation unique in this country, by means of which a patient blinded by drinking wood alcohol had his sight restored, is reported from the Montreal General Hospital.

The operation consisting of withdrawal of fluid from the spinal column by means of a lumbar puncture. This was done once each day for four days and after the second partial drainage of the column the man could see. At present, his sight is perfectly normal, a specialist states.

Wood alcohol poisoned the spinal fluid and affected the eyes and brain.

A Wise Old Bird

An eagle has been found near London, Ont., and none knows whence it came. Perhaps the official bird of the neighboring Republic has been disgraced with local conditions and migrated to Canada. The eagle is said to be a wise old fowl.

May X-Ray Insulin

The University of Illinois announced successful completion of the first step of a series of experiments which will enable scientists to use the x-ray in studying insulin, the rare and expensive solid used in treatment of diabetic patients.

Egypt's great river, the Nile, has its origin in tiny springs in the Mountains of the Moon. These are a range near the equator in the Belgian Congo between Lake Edward and Lake Albert.

Old Faithful geyser in Yellowstone national park shoots to a height of from 85 to 130 feet.

My dear friend—let bygones be bygones—now we do a little business together—no?—Daily Herald, London, England.

Great Canadian Hero

Colonel Mulloy Set High Example For Loyalty To The Empire

Colonel Lorne Winfield Mulloy, D.C.M., B.A., died unexpectedly at his home on the St. Lawrence River, Trois-Rivières, Ontario, at 11 p.m. Sunday, February 22, 1932, from heart attack, aged 83 years. Thus, with dramatic suddenness, there was removed from Canadian public life, one of its most brilliant intellects and inspiring figures.

Blinded in the South African War, Colonel Mulloy mustered every obstacle imposed by his wounds, cheerfully created fresh obstacles to surmount, scorned the paths of least resistance, was supremely successful in all tasks he undertook, and his death came at a time when his powers of intellect and his great executive abilities appeared destined to still further achievements.

Born on a Canadian farm, blinded in his early twenties, he continued his education with the aid of a secretary, graduated with honors from two famous universities, became one of the most outstanding speakers of our day on subjects of political economy, was offered more than once a seat in the British House of Commons, was on the staff of the Royal Military College, became a successful practicing lawyer, and his services to Canada during, and immediately after the war, were sufficiently conspicuous to deserve amplification.

He has been referred to as the father of the Union Government in Canada. His fight and arguments for compulsory military service are believed to have been the deciding factor in causing the United States to declare against the inefficiency of voluntary enlistment.

As early as 1910 he was one of the leaders in Great Britain in the fight for tariff reform and Empire preferences, such as are now being negotiated by the several governments affected.

Mulloy's physical handicap was not perceived by his friends, and he refused to recognize his lack of sight as either a misfortune or a handicap. His physical advantage was magnificent. He could swim, ride, row, fish, or drive a golf ball with any man. Alone he has piloted a row boat across the St. Lawrence River in a gale. He could untangle a fishing line more quickly than any companion. He never walked except at a stride. He has ever been an incessant traveller, and he never had an accident.

His humour was scintillating, clear and infectious; invariably he looked through and beyond the dark side of life. He was the soul of sincerity, generosity and integrity.

Mulloy's life should be printed in every school book, told to every pupil and repeated at every Canadian fireside. As a practical and thrilling inspiration to the boys and girls of this country, this epic of courage and triumph and high ideals will perhaps never be exceeded.

Some Amazing Facts

Many Objects Which Seem Small Are Very Wonderful

A drop of blood contains three million red globules, and there are more germs in the milk of a single cow than men in the world. So small is this germ that one grain of sand is four million times larger than it. A hundred threads of the silk worm are only one-twenty-fifth of an inch thick when placed side by side, but there are some metals that can be drawn out to such a fineness that twelve hundred wires are only as thick as a hundred silk worm threads.

May X-Ray Insulin

The University of Illinois announced successful completion of the first step of a series of experiments which will enable scientists to use the x-ray in studying insulin, the rare and expensive solid used in treatment of diabetic patients.

Egypt's great river, the Nile, has its origin in tiny springs in the Mountains of the Moon. These are a range near the equator in the Belgian Congo between Lake Edward and Lake Albert.

Old Faithful geyser in Yellowstone national park shoots to a height of from 85 to 130 feet.

The Pressure Of Necessity

Teaches People They Can Be What They Thought Impossible

A great many people we know remind us of the frog that Charles F. Kettering, chief research engineer of General Motors told about.

A deacon went his way to church one Sunday morning, dressed in his best with his shoes nicely polished, when he heard his name called from a midwife near the roadside. Down in the hole was a big bullfrog.

"I have been here three days," said the frog, "without anything to eat, and I wish you would help me out."

The deacon looked at mud and looked at the shiny shoes and remembered that he had to pass the collection plate in church, so he replied: "The frog, old man, I can't help you now, but my way back from church I'll give you a lift out of the hole."

"As he came back from church, the deacon was surprised to find the frog sitting in the middle of the road, contentedly mopping at flies."

"I thought, said you couldn't get out of that hole," said the deacon. "I thought I couldn't either until a snake came along and I just had to get out," replied the frog.

Lots of people are discovering these days that they can do things they didn't think they could do. Under the pressure of necessity every one of us can accomplish the impossible. In good times nobody uses more than a fraction of his ability and resourcefulness. But when the snake of hard times comes along, we just have to get out of the hole and like the frog in Mr. Kettering's story, we find some way to do what we didn't believe we could do.

It is a good thing for humanity that life is not always pleasant and easy. Intelligence, ability and character are only developed to their best in the face of adversity. And the harder the struggle, the more fun there is in looking back on it after the peak has been passed.

Recipes For This Week

(By Betty Barclay)

LEMON SPONGE PIE

(Makes 1 pie)

- 3 egg yolks, beaten thick.
- 5 tablespoons lemon juice.
- 1 teaspoon grated lemon rind.
- 1 cup sugar.
- 3 tablespoons flour.
- 3/4 teaspoon salt.
- 1 tablespoon melted butter.
- 1/4 cups milk.
- 3 egg whites.

Uncooked pastry. Combine all ingredients, folding in last stiffly beaten egg whites. Turn into pie tin lined with uncooked pastry and put into hot oven (450 degrees Fahrenheit). After 10 minutes reduce heat to moderate (350 degrees Fahrenheit) and bake 20 minutes longer, or until filling is firm.

ALL-BEAN QUICK BREAD

- 3 cups flour.
- 2 cups all-bran.
- 1/2 teaspoon salt.
- 1/2 teaspoon soda.
- 2 teaspoons baking powder.
- 1 tablespoon sugar.
- 1/2 cup molasses.
- 2 cups milk.
- 2 eggs.
- 2 tablespoons melted butter.
- 1 cup chopped nuts.

Sift dry ingredients. Add bran. Then add molasses; egg slightly beaten. Mix. Stir into dry ingredients, mixing well. Add nuts and melted shortening. Pour into a well greased loaf pan. Let stand 15 minutes. Bake in a moderate oven, (325 degrees Fahrenheit) from one and one-half hours.

Story Of Near Disaster

Crew Of Small Motor Tanker Fight Blazing Fire While Crossing Atlantic

Trapped by a blazing fire while crossing the Atlantic the crew of the little motor tanker "John George," fought for hours to subdue a blaze that threatened destruction of the 75-ton vessel. For 26 days after the blaze had been extinguished the 180-foot ship was steered by hand all the way across the ocean and brought into Montreal.

The story of near disaster to the "John George" was related in a casual way by her captain, Arthur Henry, the "John George," en route to the Imperial Oil Works at Toronto, left Greenwich April 7.

Claims Founding Of Club

Although the city of Hamilton is reported to be planning to celebrate this year the 40th anniversary of the origin of the Canadian Club, it is claimed Guelph was the city where the club had its birth. It is contended Malcolm MacCormack, farmer school principal here, founded the club in 1888 along with a group of prominent Guelph men.

A New Delicacy

Penguin eggs are London's newest table delicacy. They come from South Africa and sell for \$2 a dozen, but they are twice the size of hen's eggs. Penguin eggs taste like plover eggs. The South African Government is sponsoring exportation of the eggs to Great Britain.

Czechoslovakia may increase its sales tax by 25 per cent.

"LOCK YOUR DOOR ON BIRTHDAYS!"

SAYS
HUGH TREVOR

Famous Screen Star

"The woman who wants to win and hold adoration should keep youth," Hugh Trevor says.

"Stage and screen stars are not born, they are made."

"I have been here three days," said the frog, "without anything to eat, and I wish you would help me out."

The deacon looked at mud and looked at the shiny shoes and remembered that he had to pass the collection plate in church, so he replied: "The frog, old man, I can't help you now, but my way back from church I'll give you a lift out of the hole."

"As he came back from church, the deacon was surprised to find the frog sitting in the middle of the road, contentedly mopping at flies."

"I thought, said you couldn't get out of that hole," said the deacon. "I thought I couldn't either until a snake came along and I just had to get out," replied the frog.

Lots of people are discovering these days that they can do things they didn't think they could do. Under the pressure of necessity every one of us can accomplish the impossible. In good times nobody uses more than a fraction of his ability and resourcefulness. But when the snake of hard times comes along, we just have to get out of the hole and like the frog in Mr. Kettering's story, we find some way to do what we didn't believe we could do.

It is a good thing for humanity that life is not always pleasant and easy. Intelligence, ability and character are only developed to their best in the face of adversity. And the harder the struggle, the more fun there is in looking back on it after the peak has been passed.

RETIREMENT NECESSARY

The lowering of the tax rate for 1932 by 9 mills, has naturally met with the approval of every ratepayer of the town, and the council is receiving congratulations from all sides.

There is no doubt that the high rate prevailing in the past has held down the development of Lacombe. Especially since the taxation of improvements came into effect, citizens have thought twice before making improvements, knowing that they were to be penalized for so doing.

With every other industry in the country cutting down expenses and so reducing costs; with all living costs lower than they have ever been, a reduction of taxes was right in line, although the ratepayers never looked for a reduction of 22½ per cent. in one year. And our council says this is not to be the end of reductions. We have interviewed several of the councillors, and they are unanimous in their determination to get Lacombe's tax rate still lower. They have figured out the estimate very closely, and are of the opinion that they can bring the town through 1932 without a deficit. But every cent. will have to count.

It is the opinion of members of the council that salaries paid by the town are a little out of line with salaries paid by other organizations. Salaries paid at present are at the same level, if not higher, than during the past years when we were rolling in wealth. Without any doubt living costs are from 20 p.c. to 30 p.c. lower than three or four years ago, and this fact must be taken into consideration.

The School Board has made a good start, and their estimates for the year are lowered \$1500. The Hospital Board, at the last meeting, decided that a cut in salaries of their staff was necessary, and made an all around reduction of 10 p.c. The businessmen of Lacombe have also made necessary cuts in salaries to meet the times, and we do not think the Council will be inflicting any hardship by making slight reductions all around.

Lower taxes will boost Lacombe more than any other thing our Council can do.

DEATH OF WILLIE FORCHT AT CLIVE

Sunday morning, May 22nd, God again called one of our Community to him. This time a boy on the threshold of his young manhood, Willie Forcht, only son of Mr. and Mrs. L. R. Forcht, of Olive, Alberta, aged seventeen years and one month.

For four years he had been practically an invalid from heart-trouble and could not enter into the ordinary school work and sports indulged in by boys of his age yet he was always contented and cheerful, not fretting for the things he could not do but

patiently doing the things he could. He had become wonderfully proficient in fret work and had completed some very beautiful pieces. We feel our community will be a better place because Willie has lived in it. The funeral service was held Tuesday afternoon at the house and the Clive cemetery. Rev. Mr. Heard, the Pastor of Clive United Church brought comfort to the sorrowing parents and sisters, from the words of Paul: "To die is gain."

THE NEW REFRIGERATOR

Canadians are rapidly becoming a nation of salad-eaters according to a recent statement by a University Public Health authority.

"Ten or fifteen years ago, salad was a feminine accessory to the meal," reads the statement. "It was disdainfully thought of as suitable only for a luncheon party for women. How different today! Watch businessmen at their daily lunch and observe how many of them make salad its main feature. It has become, too, an almost indispensable course of the family dinner or lunch. This startling change marks an advance in the direction of sensible eating. Today we eat more fruit and fresh vegetables, more poultry and eggs, and we drink more milk."

The credit for this change in diet during the past decade belongs to certain biochemists, said Morrison & Johnston, Limited, distributors for General Electric Refrigerators here. Biochemists, they declared, discovered the green vegetables are rich in the minerals and vitamins which the body needs.

"Raw fruits and vegetables in the daily diet almost certainly protects us against pyorrhea and decayed teeth," Morrison & Johnston's representative said. "With market and refrigeration facilities what they are today, crisp salads and fresh fruits and vegetables can and should be included in every day's menu. These protective foods are for the most part highly perishable. They must be preserved at a proper, dependable temperature. With proper refrigeration, lettuce, celery, endive, peppers, and innumerable vegetables and fruits that go into the making of tempting salads are kept fresh, wholesome and beautiful. With modern electric refrigeration, salads are easy to prepare and form the substantial part of bridge luncheons and other entertainments given by the modern housewife."

THE ORIENTAL GARDENS AT SYLVAN LAKE

Those who have not yet visited the beautiful Oriental Gardens at Sylvan Lake this season, should make an effort to do so. It is the ideal place for an enjoyable evening of dancing.

This popular dance hall has been completely renovated and redecorated. No amount of labor or expense has been spared to put the dance floor in perfect shape. The hall itself is now a place of outstanding merit. The hundreds of Japanese lanterns which illuminate the place give this hall a very brilliant appearance. The beautiful orchestra setting adds color to the scene, and the wonderful orchestra, Billy Adams and his "Melody Crew" outshines any orchestra that has ever played at that summer resort. Make up your mind to visit the popular "Oriental Gardens", and you will not be sorry. In an interview with I. Woner, Proprietor of this dance hall, he assured us that he would personally see that every one from far and near would receive

courteous attention, and that he is prepared to make your visit to his Oriental Gardens a pleasurable one.

CALGARY POWER

Coming in contact with a power-line that shot 30,000 volts of electricity through his body, William Blackwell, district official of the Calgary Power Company, was instantly killed at 10 o'clock Sunday morning at Teide's Corner, 15 miles west of Gleichen.

TORONTO BROKER

ASPHYXIATED
Toronto, May 29.—Kenneth A. MacPhayden, 33-year-old head of the A. MacPhayden brokerage firm, was found asphyxiated in his home today. Carbon monoxide fumes seeped into his room from a garage in the basement.

FOR SALE

Baby's crib and mattress, in good condition. Mrs. S. Vivian, ½ block north of Hospital.

Now for the Clean-Up!

Our Big Money-Getting Sale has gone over most satisfactorily, in fact it has exceeded our expectations. Naturally, in a sale of this nature, a lot of odds and ends and broken lines have accumulated, and we are going to clean them up regardless of cost. This sale ends on Saturday, June 11th, and for the remaining days you will secure greater bargains than ever. Our goods, as you know, are all regular stock, the very best obtainable, and carry the usual Dave Hay guarantee of quality or money back. If you need a suit, an overcoat, a suit of underwear, a hat, cap, or pair of shoes, just come in and see where you can save money. In fact, it will pay you well to buy for months ahead. Remember, this Big Sale will be over on Saturday night, June 11th, so do not delay. An opportunity like this only comes once in many years.
